EXPERIENCE

Full-Stack Developer Intern   Nov '24 — Mar '25
AuMDS   Bengaluru, India

Gaining hands-on experience in frontend and backend development, database management, and API integration. Participating in training programs to enhance technical and professional skills while collaborating with teams to develop and deliver client projects within deadlines. Reporting progress to the Organizational Resource Manager and ensuring adherence to company policies.

Machine Learning Intern   Oct '23
AQMENZ Automation Pvt. Ltd.   Bengaluru, India

Trainee at Aqmenz Automation Pvt. Ltd., responsible for developing and deploying a predictive model for ice cream sales prediction. The role involves applying data analysis and machine learning techniques to create an accurate and functional predictive solution within the project timeline.

Full Stack Web Development Intern   Dec '23
Varcons Technologies Pvt Ltd   Bengaluru, India

I completed a Full Stack Web Development Internship from October to December 2023, where I focused on developing web templates and worked across both frontend and backend technologies. My tasks included designing web pages, managing databases, and coding to create dynamic, responsive web solutions. I gained hands-on experience in full-stack development, collaborating with senior developers, and deepened my understanding of modern web technologies.

PROJECTS

Flask-Based Blog Platform with User Authentication and Management
- Developed a blog website using Flask, SQLAlchemy, and Flask-Login for authentication. Features include a rich text editor, admin controls, user comments, and a responsive UI with Flask-Bootstrap and Gravatar. Implemented secure, environment-based configurations.

House rental management system website
- Designed and developed a dynamic rental website using CSS for UI, PHP for backend, and Oracle SQL for efficient data management. Features include property listings, advanced search, and a seamless booking system, enhancing user experience and scalability.
